

CONNECTED FOR OPPORTUNITY

Our experience of SABEN at Boland TVET College

SABEN Connects 2026 | Cape Town

Presented by:
Warren Groeneveld
Assistant Director: Information Technology

One college, six sites

- SABEN provides our connectivity
- Access: services reachable from any campus
- Consistency: the same experience everywhere
- Collaboration: teams working across distance
- Resilience: holding up under peak demand
- The job is to make six sites feel like one

Where the value shows up

- Not in the network diagram, in the day's work
- Students: registration, communication, online learning
- Staff: teaching material, platforms, working across sites
- The institution: cloud systems and shared services
- Connectivity is working when nobody notices it

One example

- Challenge. Response. Outcome.
- Challenge: everyone needs everything at once
- Response: SABEN's link, our team on the ground
- Outcome: less disruption, clearer capacity picture

Three takeaways

- Connected campuses create connected opportunities
- Connectivity enables, operations deliver
- Impact is told through people, not throughput
- The SABEN community shortens the path to a fix

Thank you
